Professional Summary

Fresher Java Full-Stack Developer with a PG Diploma in Advanced Computing from CDAC. Built full-stack applications using Spring Boot, React.js, Node.js, REST APIs, JWT security and MySQL, including a microservices-based travel booking platform with Stripe payments. Comfortable with Docker, CI/CD and AWS fundamentals, and with using AI tools and prompt engineering to build faster. Strong foundation in DSA, OOP and unit/integration testing, with 200+ problems solved.

Skills

Languages: Java, JavaScript, SQL
Frontend: React.js, React Router, Axios, HTML5, CSS3
Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, Node.js, Express, REST APIs, JWT, Microservices
Database: MySQL
Core: DSA (200+), OOP, Exception Handling
DevOps & Cloud: Docker, Docker Compose, CI/CD, AWS
AI Tools: Prompt Engineering, ChatGPT, Claude, GitHub Copilot, Cursor
Tools & Testing: Git, GitHub, Maven, Postman, JUnit 5, Mockito

Projects

TripSync – Travel Booking Platform **Team Project**
Tech: Java 21, Spring Boot, Spring Cloud API Gateway, Spring Security, JWT, React 19, React Router, Axios, Stripe, JUnit 5, Mockito, Postman

- Built a travel booking platform on a **microservices architecture** (Auth, Catalog, Booking, Feedback) behind an API Gateway as the single entry point.
- Implemented **JWT authentication** and role-based access control (Admin/User) with Spring Security.
- Integrated **Stripe** payments into the booking flow, with automatic booking confirmation after payment.
- Platform covers tour package browsing, booking, and 1–5 star reviews per package, with a React 19 frontend using protected routes and Axios.
- Wrote unit tests (JUnit 5, Mockito) and integration tests per service, and verified APIs with Postman.

Prime Properties – Real Estate Listing Application **CDAC Capstone**
Tech: Java 17, Spring Boot, Spring Security, Hibernate/JPA, MySQL, JWT, React.js, Axios, HTML5, CSS3, JUnit 5, Mockito

- Built a full-stack property platform for buyers, owners and admins using a layered architecture (Controller, Service, Repository).
- Secured REST endpoints with **JWT** and role-based access control; added input validation and consistent error responses (400/401/403/404).
- Found and fixed an **N+1 query problem** in the listing flow using JOIN FETCH and @EntityGraph, confirmed by comparing DB call counts before and after.
- Implemented owner features to add, update and delete listings, with a safeguard that blocks deletion of properties with active bookings.
- Tested business logic and role-based authorization with JUnit 5 and Mockito; validated APIs with Postman.

TaskFlow Planner – Task Management Application **Personal Project**
Tech: React 18, Vite, Tailwind CSS, Zustand, Node.js, Express, Sequelize, MySQL 8, JWT, Zod, Docker Compose, Prompt Engineering

- Built and re-architected a client-side React app into a full-stack task manager with list, **Kanban (drag-and-drop)** and calendar views, backed by a documented REST API and MySQL.
- Implemented **JWT authentication** with bcrypt hashing and per-user ownership checks on every route; validated requests with Zod.
- Designed a normalized schema (users, categories, tasks, subtasks) with cascading deletes and reversible **Sequelize migrations**, run on MySQL 8 via **Docker Compose**.
- Added search, filters, multi-field sorting, overdue detection, dark mode and JSON import/export; used **prompt engineering** with AI tools to speed up development.

Education

Institute of Advanced Computing (IACSD), CDAC — Pune, India
PG Diploma in Advanced Computing (PG-DAC) | Score: 70% — *Aug 2025 – Feb 2026*

Dr. D. Y. Patil School of Engineering — Pune, India
Bachelor of Engineering | 7.91 CGPA — *2018 – 2021*

Government Polytechnic, Awasari (Khurd) — Pune, India
Diploma in Engineering | Score: 70% — *2015 – 2018*

Achievements

- Practiced **200+ DSA problems** on LeetCode and GeeksforGeeks.
- **Career transition**: Prepared full-time for the UPSC Civil Services Examination (2021–2025), then retrained in software development through CDAC PG-DAC.
